

Our Offer

- We conduct Phase I-IV interventional clinical trials in compliance with GCP and current Austrian and European legislation
- We conduct vaccine trials with healthy volunteers or specific risk groups
- We have an experienced specialist team of study doctors, study nurses and study coordinators
- We assist with the planning of clinical trials
- We analyse humoral/cellular immune response using the very latest immunological laboratory techniques

Vaccine trials – Mastering the challenge

In order to guarantee the safety of trial participants and the quality of a clinical trial, clinical research requires meticulousness, high-quality and complete documentation, knowledge of the current legal situation, generally recognised working procedures and modern infrastructure and laboratory equipment.

The Clinical Trials Division at the Institute of Specific Prophylaxis and Tropical Medicine (ISPTM) has many years' experience as a study centre in a wide range of vaccine trials.

Our expertise, know-how and specialisation in the field of vaccinology using state-of-the-art evaluation methods provide a crucial interface between research and clinical application.

Our Strengths

- We conduct trials according to Good Clinical Practice (GCP), Good Laboratory Practice (GLP) and Good Scientific Practice (GSP)
- We are a dynamic, committed, empathic team
- We have many years' experience and know-how in the development and testing of vaccines in healthy people and risk populations
- We keep up to date with relevant training
- We enjoy excellent internal and external communications
- We guarantee the quality of clinical trials via regular relevant training and refresher courses (e.g. GCP), seamless documentation, excellent communications, rapid handling of queries and much more.
- We publish study results in international peer-reviewed journals
